**Section A (6 marks)**

For each question from 1 to 3, four options are given. One of them is the correct answer. Make your choice (1, 2, 3 or 4) and write the answers in the boxes given below.

|    |  |    |  |    |  |
|----|--|----|--|----|--|
| 1. |  | 2. |  | 3. |  |
|----|--|----|--|----|--|

- 1 Diagram 1 below shows a ring magnet lowered into a tray of steel pins. Diagram 2 shows the bottom view of the ring magnet.

Diagram 1

Diagram 2

Which of the following most likely shows the number of pins attracted to the bottom of the ring magnet at positions A, B and C?

|     | A  | B  | C  |
|-----|----|----|----|
| (1) | 15 | 10 | 5  |
| (2) | 10 | 10 | 10 |
| (3) | 12 | 6  | 12 |
| (4) | 6  | 18 | 6  |

- 2 Jonathan placed a packet of tea into a mug without spilling it as shown in the diagram below.

Which of the following about the packet of tea is correct?

- (1) Both the shape and volume of the tea changed.
- (2) The shape of the tea changed but the volume did not.
- (3) The volume of the tea changed but the shape did not.
- (4) Both the shape and volume of the tea did not change.

- 3 Gopal set up four experiments, W, X, Y and Z, using water in containers made of the same material.

The table below shows the different conditions at the start of each experiment.

| Variable  | Experiment |     |     |     |
|---|------------|-----|-----|-----|
|   | W          | X   | Y   | Z   |
| Room temperature ( $^{\circ}\text{C}$ )         | 28         | 28  | 31  | 28  |
| Exposed surface area of water ( $\text{cm}^2$ ) | 60         | 120 | 60  | 60  |
| Volume of water ( $\text{cm}^3$ )               | 500        | 500 | 500 | 400 |

Gopal wanted to investigate how the rate of evaporation of water was affected by the room temperature.

Which of the following two experiments should Gopal compare?

- (1) W and Y
- (2) X and Z
- (3) Y and X
- (4) Z and Y

**Section B (6 marks)**

For questions 4 to 5, write your answers in the spaces provided.

- 4 James set up the following experiment to investigate four similar planks of different materials, A, B, C and D.

For each material, he added weights until the plank broke. The graph below shows the results of James' experiment.

- a) Which property of the materials was James trying to investigate in his experiment? [1]

---

- b) State a variable that James had to keep the same in order for him to carry out the experiment fairly. [1]

---

- c) Based on the results, which material, A, B, C or D, should James use if he wants to make a bookshelf that can hold heavy books. Give a reason for your answer. [1]

---

---

- 5 On a hot day, a group of scouts went camping at a beach. To obtain fresh water from the sea water, they constructed a set-up as shown in the diagram below.

- a) What is the purpose of the plastic sheet used in the above set-up? [1]

---

---

- b) After a few hours, fresh plain water was collected in the cup. [2]  
Describe how fresh plain water was obtained.
